SAFETY

Sanax Medical is a Western Australian owned and operated company which specialises in the supply of premium quality first aid, medical, pharmaceutical, rescue and safety products and consumables.

With over 30 years experience it has gained a long standing reputation for excellence in service and supply, tailoring orders to meet the specific needs of individual companies, businesses, local governments, service providers, sporting clubs and associations.

The company employs three pharmacists who are registered with the Pharmaceutical Society of Western Australia. The company Principal and owner Greg McKay is a qualified pharmacist as well as directors Gavin and Campbell McKay. This enables it to supply prescription and over the counter medications to those holding current Health Department poisons permits.

With ten administration and customer service staff, and the ability to source over 22,000 different products, customers may rest assured all orders will be met and dispatched in a fast and efficient manner, including to those living and working in remote areas.

Sanax sources products from both Australia and overseas and will supply Australian, premium quality brands unless otherwise requested.

We are well known in the industry for our ability to source any product requested. There is nothing too big or too small and we always ensure that it has been TGA approved if necessary. Our large network of suppliers enables us to source product alternatives if needed.

We have developed our product range to ensure that we are holding enough of our stock products to meet order turn around for most orders the next business day after receiving your orders. And our unique point of difference to most of our competitors is that we allow single unit purchases from our fast moving stock lines, this means that you don't have to purchase a box of 100 dressings if you are only likely to use just a few. The benefit of this is reduced spending at initial purchase as well as reduced costs involved for wasted product.

Our business ethos is such that we have a can do attitude, so we are just a call or email away from being able to assist you.

Sanax Medical is committed to ensuring all our first aid kits comply with the new harmonised national standards for Occupational Health and Safety laws.

Our first aid kits have been designed to reduce the risk of cross infection by including single use or sterile options instead of multi use bottles.

\*Please note that this kit contains scheduled medication and will require the customer to provide Sanax Medical with a copy of their relevant Poisons Permit before purchase is permitted.

# Customised Kits

## Empty Bags and Cases

Custom design your first aid kit  
Everything you need and nothing you don't

Are you providing your employees with optimal first aid products suited to the type of injury that they may sustain whilst performing their day to day duties.?

We can provide you with first aid kits that suit your work place and will allow your employees to treat their injuries on site with the best product for the particular injury.

If your workplace is prone to a particular type of injury, for example cuts and grazes on the knuckles , we can ensure that your kit contains our fabric knuckle plasters; if you have a lot of debris floating around and your staff are susceptible to having eye issues because of this we can include more eye wash products.

We will provide you with a contents list for your kit so that you can ensure that it is stocked up and ready to go at all times. You can even return the kit back to us and have us restock it for you.

Sanax Medical also offers a complete range of trauma bags, click clack boxes and pelican cases.. Some examples are below. Please contact us for the complete range available.
